

## Environmental Policy Statement

Sunmow Company's environmental management prioritizes decreasing the resources utilized and carbon footprint of its directly managed operations, all the while backing the environmental conservation and impact reduction endeavours of its portfolio companies. The objective is to foster sustainability and environmental consciousness across all levels of the firm, as outlined below:

- ❖ To utilize this Policy as a catalyst for environmental mindfulness
- ❖ To foster environmental awareness within the Company, educating the employees on sustainability practices and engaging stakeholders in our environmental initiatives by implementing additional measures to promote green consciousness
- ❖ To uphold sustainability commitments and following all relevant environmental laws
- ❖ To encourage employees to use electricity and water wisely when using office equipment and facilities, be mindful of the energy and water consumption
- ❖ To promote the "Reduce! Reuse! Recycle!" practices by decreasing paper and material usage by digitizing processes
- ❖ To ensure and encourage all Sunmow Company's suppliers, vendors and business partners to follow environmentally responsible practices
- ❖ To promote and ongoing investment in technologies that can offer alternatives to business travel
- ❖ To adopt and continuously improve by reviewing our Environmental Management system along with the objectives, targets, policies and practices
- ❖ To align with Sustainable Development Goals (SDG) Goal 17, we are committed to fostering partnerships for sustainable development, advocating for environmentally responsible practices in the construction industry, and collaborating with stakeholders to advance shared goals of environmental preservation and resource efficiency.
